DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to solder for joining microelectromechanical components, classified in class 257, subclass 772.
- II. Claims 2-12, drawn to a microelectromechanical device, classified in class 257, subclass 772.
- III. Claims 13-18, drawn to a process for producing a microelectromechanical device, classified in class 438, subclass 612.
- IV. Claims 19, 20, drawn to an assembly including a first structure connected to a second structure by a solder joint, classified in class 257, subclass 772.
- V. Claim 21, drawn to a method for joining a first structure to a second structure, classified in class 438, subclass 612.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, IV and III, V are related as product made and process of making.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case one layer of a solder joint could be produced

Art Unit: 2826

through physical vapor deposition or through screen printing, hence the product could be made through another and materially different process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Groups I, II, and IV are not required for Groups III and V, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
